Your
health

Messages

Note: What you can get in the NHS App may be determined by your GP practice

THE NHS APP.....

- Also worth downloading/setting up;
 - PATCHS (can be accessed from within the NHS App):
 - Question and messaging app
 - Airmid (if your GP uses SystemOne):
 - Similar to NHS App but may contain more complete medical records and you can enter information your GP can see (eg blood pressure, blood glucose measurements, weight etc) and can import information from eg the Apple Health app
- Both the above can use your NHS login I believe
